

N ESWAR REDDY

Hyderabad | neswar215@gmail.com | 7815919728 | LinkedIn

Profile Summary

Associate Software Engineer with 1 year of experience in full-stack development, building scalable web applications using modern technologies. Strong in problem-solving, debugging, and REST API development, with exposure to testing methodologies and production support. Quick learner with the ability to adapt to dynamic environments and deliver high-quality solutions.

Experience

Tinitiate | Full Stack Developer

FEB 2025 – Present

Next.js Tutorial Platform | Full-Stack Web Application

- Developed a scalable tutorial platform using Next.js and React, implementing secure authentication with Google OAuth via NextAuth and building a protected dashboard to dynamically load subjects and topics from a GitHub-based JSON repository.
- Designed and implemented RESTful APIs enabling favorites management, advanced search operators, and progress tracking while rendering Markdown-based tutorials with syntax highlighting and copy-to-clipboard for code blocks.
- Implemented Progressive Web App (PWA) capabilities including offline access, caching strategies, customizable themes, and localStorage-based learning progress tracking.

Gym Wellness Management App | Role-Based Mobile Application

- Developed a role-based cross-platform mobile application using React Native with secure authentication workflows including login/signup and role-based access control.
- Built dynamic dashboards for Trainers, Members, Sellers, and Admins supporting client management, subscription tracking, product sales monitoring, payment insights, and user administration.
- Implemented responsive UI components, efficient state management, and structured JSON-based backend integration ensuring scalable mobile architecture and seamless navigation.
- Created and executed test cases for validating application functionality and performance. Performed debugging and issue resolution during development and deployment phases. Ensured code quality and compatibility.

Personal Projects

LinkedIn-Inspired Social Media Web Application

- Designed and developed a full-stack social media platform using the MERN stack (MongoDB, Express.js, React.js, Node.js), enabling scalable user interactions and seamless data management.
- Implemented secure authentication and authorization using JWT and bcrypt.js, along with RESTful APIs for user management, post creation, and connection requests, ensuring data security and efficient backend operations.
- Built real-time features including likes, comments, connection requests, and live notifications using Socket.io, and integrated Multer with Cloudinary for optimized image uploads; developed a responsive UI using React and Context API for state management.

MERN Stack Book Store Application

- Developed a full-stack Book Store web application using the MERN stack (MongoDB, Express.js, React.js, Node.js), implementing complete CRUD operations and designing RESTful APIs with Mongoose for efficient data management and backend scalability.
- Built a responsive and user-friendly frontend using React, Vite, and Tailwind CSS with dynamic routing (React Router), enhancing user experience through interactive UI components such as modals, alerts, and card-based layouts.

Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL

Frontend: React.js, Next.js, Redux, Tailwind CSS, Responsive Design

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Databases: MongoDB, MySQL

Tools: Git, GitHub, Postman, Docker, CI/CD

concepts: OOPS

Education

UG: Bharath University — CSE

GPA: 8.8/10.0

June 2019 – June 2023

Certifications

- Software Engineering Virtual Experience Program, Accenture (Forage)
- Web Development Internship, Ramanasoft Technologies
